DS1402X
MicroLAN Cables

FEATURES

- Coiled cables to connect iButtons® to MicroLAN Networks
- Convenient, off-the-shelf connectivity
- Blue Dot Dual Receptors for momentary (F3/F5 MicroCan®) or dwelled contact (F5 MicroCan only) with adhesive pad to mount on objects (DS1402D-DB8, DS1402D-DR8, each 2.4m max.)
- Touch-and-Hold Probes DS1402BP8 and DS1402RP8 for momentary touch (F3/F5 MicroCan) or dwelled contact (F5 MicroCan only) in 2.4m length max.
- iButton cable to connect COM Port to iButton Holder (DS1402BR8) in 2.4m length max.
- Can be used with any Dallas Semiconductor port adapter
- iButtons can be connected in any combination

ORDERING INFORMATION

DS1402D-DB8   2.4m (8ft) cable
DS1402D-DR8   2.4m (8ft) cable
DS1402BP8   2.4m (8ft) cable
DS1402RP8   2.4m (8ft) cable
DS1402BR8   2.4m (8ft) cable

DESCRIPTION

Using four basic types of connectors, RJ-11, iButton, Touch-and-Hold Probe, and Blue Dot Receptor, the DS1402 series of MicroLAN cables provides connectivity for iButtons. The cables are designed to connect any COM-port adapter or parallel port adapter to any iButton. Both, the iButton probe cables and the Blue Dot receptor cables can touch any iButton, but can only hold the F5 version iButtons. The DS1402BR8 is the only cable that connects to the DS1401 iButton Holder. Applications of the DS1402-series MicroLAN cables range from software protection to handheld computers and MicroLANs.

Connectivity Matrix

Cable Part Number	Connects From	To
DS1402D-DB8 Blue Dot Receptor Cable	DS1410, DS1411, DS1413, any version or DS1401	any iButton
DS1402D-DR8 Blue Dot Receptor Cable	DS9097 any version	any iButton
DS1402BP8 iButton Probe Cable	DS1410, DS1411, DS1413, any version or DS1401	any iButton
DS1402RP8 iButton Probe Cable	DS9097 any version	any iButton
DS1402BR8	DS9097 any version	DS1401 Front Panel iButton Holder
