

LH0061/LH0061C 0.5 Amp Wide Band Operational Amplifier

General Description

The LH0061/LH0061C is a wide band, high speed, operational amplifier capable of supplying currents in excess of 0.5 ampere at voltage levels of $\pm 12\text{V}$. Output short circuit protection is set by external resistors, and compensation is accomplished with a single external capacitor. With a suitable heat sink the device is rated at 20W.

The wide bandwidth and high output power capabilities of the LH0061/LH0061C make it ideal for such applications as AC servos, deflection yoke drivers, capstan drivers, and audio amplifiers. The LH0061 is guaranteed over the temperature range -55°C to $+125^\circ\text{C}$; whereas, the LH0061C is guaranteed from -25°C to $+85^\circ\text{C}$.

Note 1: Specifications apply for $\pm 5\text{V} \leq V_S \leq \pm 18\text{V}$, $C_C = 3000\text{ pF}$, and $-55^\circ\text{C} \leq T_C \leq +125^\circ\text{C}$ for the LH0061K and $-25^\circ\text{C} \leq T_C \leq +85^\circ\text{C}$ for the LH0061CK. Typical values are for $T_C = 25^\circ\text{C}$.

Note 2: The inputs are shunted with back-to-back diodes for overvoltage protection. Excessive current will flow if a differential voltage in excess of 1V is applied between the inputs without limiting resistors.

Note 3: For supply voltages less than $\pm 15\text{V}$, the absolute maximum input voltage is equal to the supply voltage.

Note 4: Rating applies as long as package power rating is not exceeded.

Note 5: Refer to RETS0061K for LH0061K military specifications.
