**DESCRIPTION**

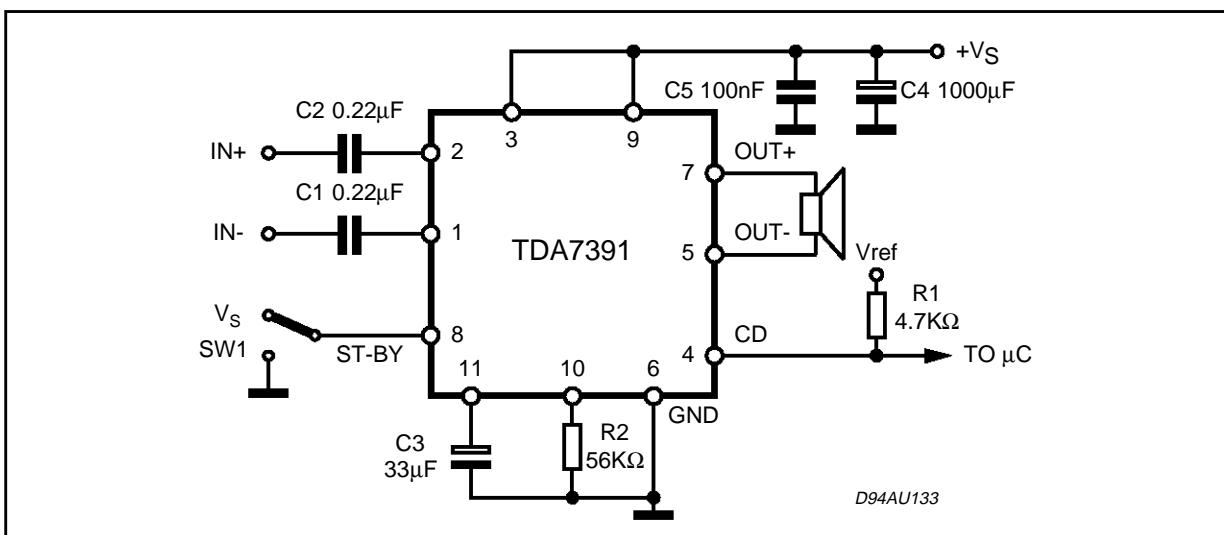

The TDA7391 is a BRIDGE class AB audio power amplifier specially intended for car radio High Power applications.

The high power capability together with the possibility to operate either in DIFFERENTIAL INPUT MODE or SINGLE ENDED INPUT MODE makes it suitable for boosters and high end car radio equipments.

The exclusive fully complementary output stage and the internal fixed gain configuration drop the external component count.

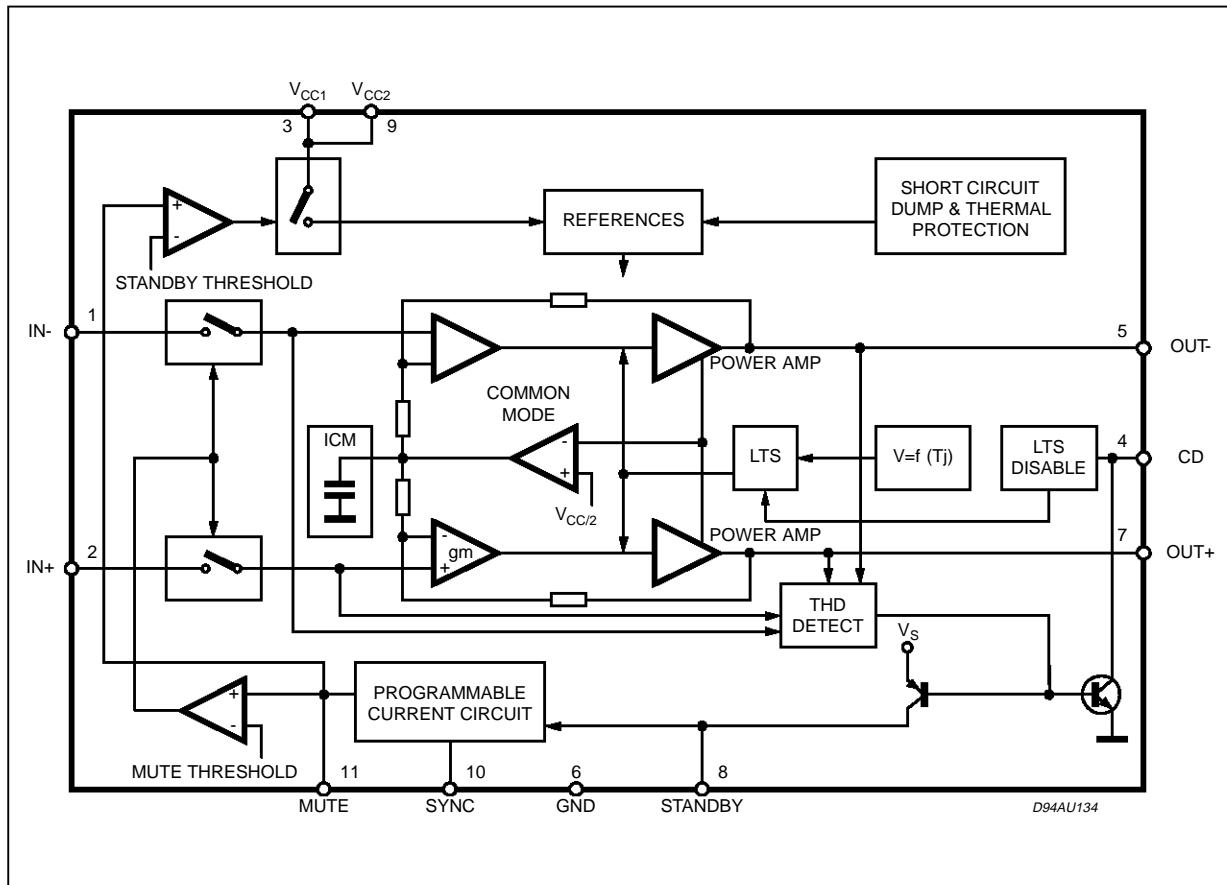

The on board clipping detector allows easy implementation of gain compression systems.

## FUNCTIONAL DESCRIPTION

Pin	Function	Description
1, 2	INPUTS	The input stage is a high impedance type also capable of operation in single ended mode with one input capacitively coupled to the signal GND. The impedance seen by the inverting and non inverting input pins must be matched.
3,9	+Vs	Supply Voltage.
4	CD	The TDA7391 is equipped with a diagnostic circuitry able to detect the clipping in the Output Signal (distortion = 10%). The CD pin (open collector) gives out low level signal during clipping.
5, 7	OUTPUTS	The output stage is a bridge type able to drive loads as low as 3.2Ω. It consists of two class AB fully complementary PNP/NPN stages fully protected. A rail to rail output voltage swing is achieved without need of bootstrap capacitors. No external compensation is necessary.
6	GND	Ground.
8	STAND-BY	The device features a ST-BY function which shuts down all the internal bias supplies when the ST-BY pin is low. In ST-BY mode the amplifier sinks a small current (in the range of few μA). When the ST-BY pin is high the IC becomes fully operational.
10	SYNC	A resistor (R <sub>2</sub> ) has to be connect between pin 10 and GND in order to program the current that flows in the C <sub>3</sub> capacitor (pin 11). The values of C <sub>3</sub> and R <sub>2</sub> determine the time required to bias the amplifier.
11	MUTE	The pin will have a capacitor (C <sub>3</sub> ) tied to GND to set the MUTE/STAND-BY time. An automatic Mute during turn on/off is provided to prevent noisy transients.
