

MARCONI A.C. MAINS VALVES

ML 4, Low Magnification, 17/6

ML.4 is a low impedance valve for use as a small output valve, initial L.F. amplifier, or oscillator. The high conductance provides a considerable stage gain, so that ML.4 can be recommended where sensitivity is required without the use of a pentode. The output is sufficient for average domestic volume with a moving iron speaker.
